

Bonn-Cologne Summer School in Physics

22–26 August 2016

Physikzentrum Bad Honnef,
Germany

TOPICS

From black holes to dark energy:
unveiling the wildest regions in the
universe with x-ray space telescopes

Thomas Reiprich | Florian Pacaud | Thomas Tauris

Challenging the standard model

Klaus Desch | Philip Bechtle

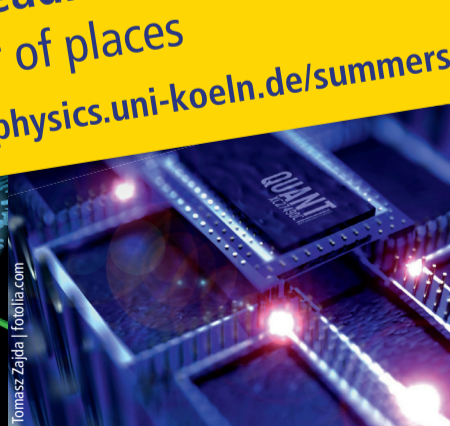

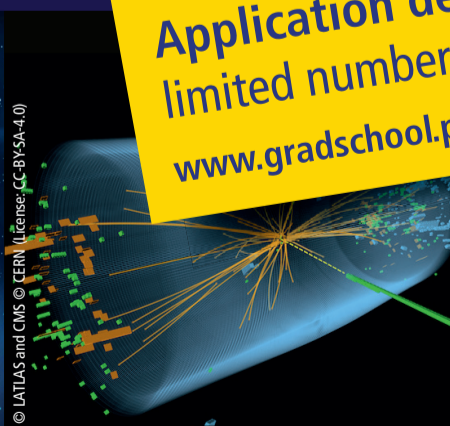

Quantum information: from true
randomness to quantum computers

David Gross | Achim Rosch

Summer school for physics students
(Bachelor) ca. 4th semester

Application deadline April 30th 2016
limited number of places
