Science meets Business: Physikerinnen und Physiker im Beruf

**Challenges of Medical Solutions:
Development of Optical Diagnostic Instruments**
Dr. Jochen Horn, Carl Zeiss Meditec Inc.,

Dr. Horn (Director, Systems Engineering and Optics Design) will introduce the Carl Zeiss Meditec Inc., and then explain how optical diagnostic instruments are being developed in a typical industrial product development process as used at Carl Zeiss Meditec. It will also be explained, what the roles are of a variety of engineering functions and scientists in that development process, how physicists fit into this picture, and what the career development opportunities are.

All interested students are cordially invited.
